Sebastian Weidlich

Senior Flutter Developer · Product, Development, Release

Available from October 2026 · Berlin & remote

sebastian@weidlich.dev · Berlin, Germany · weidlich.dev · LinkedIn

Senior Flutter developer (10+ years in software development) with a backend background (Firebase, .NET). At Appsfactory: one of three tech leads for a 40-person full-stack team; client projects for Vattenfall, Deutsche Bahn and Porsche. Co-founder and CTO of Kiezpass UG, sold in 2025. Freelancing since 2021; six apps shipped to the App Store and Google Play since then, as a freelancer and co-founder. Focus: maintainable architecture (Riverpod, MVVM), automated tests and CI/CD all the way to store release. Available – in Berlin or remote.

01 EXPERIENCE

2021 – Present

Freelance

- Designed, built and published apps on the App Store and Google Play – for clients and as my own products; full-stack with Flutter and Firebase, including backend, CI/CD and release management.
- Clients include Megunto (e-learning/medicine) and Twiggli (events platform).
- Since 2026, my own Flutter workspace with reusable packages, tests and CI.

2024
company sold

Co-founder & CTO, Kiezpass UG

- Owned product, design, architecture, development and release of the deals app for Berlin restaurants and bars – from the initial idea to the sale of the company.
- 500+ users, pilot with dozens of restaurants and bars, 4/5 store rating.

TASKS
- iOS and Android app: deals on a map with clustering and offline tiles, login by SMS code, booking and redeeming deals, push.
- Web CMS in Flutter for partners (profile, deals, messages, reviews) and the team (places, templates, push campaigns); partner payments via Stripe.

ARCHITECTURE App and CMS with get_it, ChangeNotifier (MVVM) and auto_route, typed Firestore access via code generation; serverless backend on Firebase.

TESTING Firestore security rules tests in the Firebase emulator.

TOOLS & APIS Firebase (Auth, Firestore, Cloud Functions, Storage, Messaging, App Check, Crashlytics), Stripe, Codemagic, Figma

STORE Google Play

2020 – 2021

Tech Lead, Appsfactory GmbH

- Coordinated a full-stack team of 40 developers as one of three tech leads.
- Designed software architectures and conducted code reviews across multiple client projects.
- Established development guidelines and best practices and embedded them in the team's daily work.
- Led team meetings and organized knowledge transfer between projects.

2014 – 2019

Full-Stack Developer, Appsfactory GmbH

- Planned and delivered projects in agile teams.
- Developed backend and CMS systems with .NET and Microsoft Azure for the clients' apps.
- Contributed to Xamarin apps at times.
- Clients: Vattenfall, Deutsche Bahn, Porsche, Swiss Re, Lidl, Bayer 04 Leverkusen, Burda Verlag, GU Verlag

---

02 PROJECTS

2025 – 2026

Megunto

Store rating 5/5

STACK Flutter (iOS + Android + Web) · REST API (OpenAPI) · Auth0 · Stripe
INDUSTRY E-learning / healthcare

Flutter app for iOS, Android and web for an existing exam-prep platform for doctors and medical students, on the existing backend, with AI-assisted evaluation. The app's UX concepts were adopted for the relaunch of the web platform.

TASKS
- Login via Auth0, exam simulations with text and voice input (transcribed via the backend API), questions read aloud, audio mode.
- Interface for the AI-assisted evaluation and weak-spot analysis; courses, statistics, learning streak, course purchase via Stripe (web).
- Design in Figma, release to the App Store and Google Play.

ARCHITECTURE Services with get_it, controllers with ChangeNotifier, routing with auto_route; API client generated from the OpenAPI spec (Retrofit, Dio).

TOOLS & APIS Auth0, Stripe, GitHub Actions, Docker, Google Cloud Run (three environments), App Store Connect, Play Console

STORE App Store · Google Play

2025

Twiggli

STACK FlutterFlow · Flutter (iOS + Android) · Firebase · Stripe
INDUSTRY Events and experiences platform

Took over an existing FlutterFlow app and got it through App Store and Google Play review for the first time, within a month.

TASKS
- Fixed critical bugs (sign-up, login, feeds), checked Stripe payments end to end.
- Booking confirmation emails to guest and host, rating system.
- Resolved Apple rejections: content filter and visible report button (Guideline 1.2), photo library purpose string (5.1.1), Sign in with Apple (4.8).

TOOLS & APIS FlutterFlow, Firebase, Stripe, Sign in with Apple, App Store Connect, Play Console

STORE App Store · Google Play

2021 – Present

Own apps

STACK Flutter (iOS + Android) · Firebase · Riverpod · get_it
INDUSTRIES Places to work · productivity · fitness · travel

Since 2026 in one Dart workspace: 17 reusable packages (login, in-app purchases, push, deep links, maps, analytics, design system) for Kiezwerk, Banana List and Hoop-Fit.

ARCHITECTURE Four layers (domain, data, application, presentation), third-party SDKs only in the data layer; logic packages free of state management, used by Riverpod and get_it apps alike.

TESTING Unit and widget tests in all apps and packages (mocktail, fake_cloud_firestore), security rules tested in the Firebase emulator.

TOOLS & APIS GitHub Actions as a required check on every pull request, Codemagic for store releases, Cloudflare Pages; RevenueCat, Firebase Cloud Messaging, Crashlytics, TelemetryDeck

Kiezwerk Release planned

STACK Riverpod (code generation) · go_router · Firestore geo queries · Cloud Functions (Dart, TypeScript) · Geofencing

A map of places to work in Berlin with Wi-Fi, outlets, noise level and who is working there right now; check-in with a work log, automatic check-out via geofencing, admin area and a web tool for importing places.

Banana List Store rating 5/5

STACK get_it · ChangeNotifier (MVVM) · Firestore · RevenueCat

Shared checklist app with real-time sync, optimistic UI and its own design system; moved into the workspace in 2026.

STORE App Store · Google Play

Hoop-Fit

STACK get_it · ChangeNotifier (MVVM) · Firebase · RevenueCat · Sensors

Hula hoop training, rebuilt in 2026: animated moves, workouts with a speaking coach, a rotation counter using the motion sensors, Apple Health and Health Connect.

STORE Google Play

AllAboard Trip Planner 800+ users

STACK get_it · ChangeNotifier (MVVM) · Firebase · Google Maps · OpenAI

Group trip planning (2021–2023): real-time collaboration, offline use, cost splitting in a Cloud Function; unit tests and Firestore rules tests in the emulator.

STORE App Store · Google Play

03 SKILLS

MOBILE & FRONTEND	Dart · Flutter · Riverpod · get_it/MVVM · go_router · auto_route · FlutterFlow · Figma · JS/TS · Webflow
BACKEND & CLOUD	Firebase · C#/.NET · Azure · Google Cloud Run · Cloudflare · REST/OpenAPI · NoSQL/SQL
INTEGRATIONS	Stripe · RevenueCat · Auth0 · Sign in with Apple/Google · Firebase Cloud Messaging · TelemetryDeck · OpenAI
TESTING & RELEASE	Unit and widget tests · mocktail · Firebase emulator · GitHub Actions · Codemagic · App Store Connect & Play Console · Git · Scrum

04 EDUCATION

2009 – 2014 **Dipl.-Ing. (FH) Multimedia Technology**, Mittweida University of Applied Sciences

Specialization in programming and app development.
